# 3-Port Solenoid Valve Modular Type/ Residual Pressure Release Valve with Detection of Main Valve Position

## VP546/746 Series

### Features

- Can be connected to modular type F.R.L. units (AC-D series)
- With main valve position detection function  
The main valve position detection function is used to detect inconsistencies between input signals and valve operations.
- A model with a soft start-up function is also available.
- Variations

Residual Pressure Release Valve		Dual Residual Pressure Release Valve If one of the valves fails to operate, the other one releases the residual pressure.	
	With soft start-up function 		With soft start-up function 

- A variety of safety limit switches (Made by OMRON or Rockwell Automation) are available.
- Features a check valve built into the pilot flow path (Supports pilot pressure drops caused by pressure fluctuations on the inlet side)

### Caution

To ensure the safest possible operation of this product, please be sure to thoroughly read the "Safety Instructions" in our "Best Pneumatics" catalog before use.
